

# CROWN

A modular ceiling system that brings  
acoustic comfort, integrated light  
and visual rhythm together.

Designed around how a space sounds, looks and feels. Crown brings acoustic comfort, integrated lighting and visual depth into a single modular ceiling system. Its shaped acoustic modules soften the grid overhead, offering a distinctive alternative to conventional ceilings.

**Where people work, learn and gather**

Crown adapts to the way a space is used.

It brings clear light to active settings, a softer glow to relaxed ones and a calmer sound experience throughout.

**Flexible and adaptable**

Modular construction allows easy integration, scalability, maintenance, and lighting compatibility across different layouts.

### Light for the task

Built-in spotlights or square lights shine directly into the room, giving active spaces clear and practical illumination.

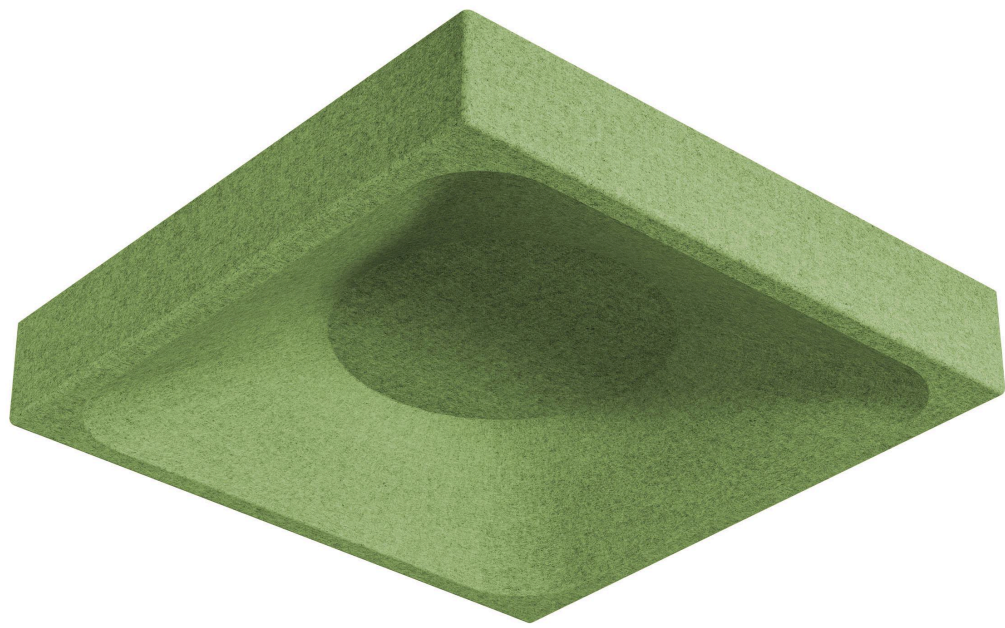

### Light for the mood

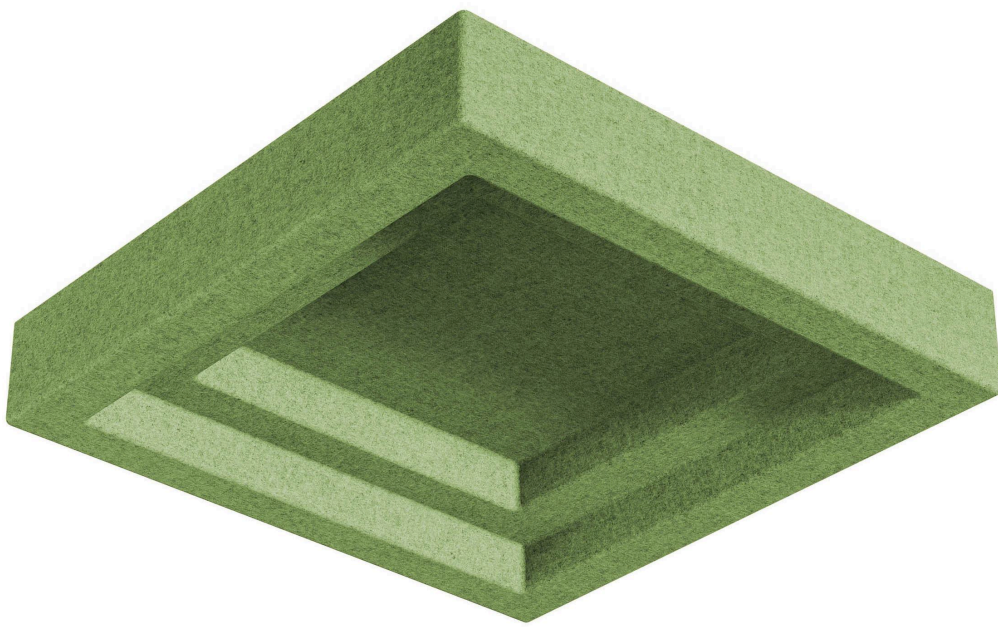

Hidden lighting creates a gentle glow around the ceiling design, bringing warmth and atmosphere to spaces made for dining, waiting or unwinding.
