

# PROJECT

# | HIGHLIGHTS |

Client: 7-Eleven

Designer: Gensler

City: Bangalore

Completion: 2024

A leading American convenience store chain, **7-Eleven, Inc.** is expanding its footprint across the globe to provide accessible shopping options for customers worldwide. The company needed a workspace that reflected its growth mindset by steering employee productivity.

Reflecting upon the client's requirements, we designed a workspace depicting the vibrant essence of the brand. The incorporation of acoustic panels in varied combinations fosters an acoustically comfortable environment. The ribbed ceiling panels further help in accentuating the aesthetics of the space while enhancing focus and performance. Using printed panels on the wall brings a word of recognition to the employees, encouraging them to perform to their optimal best.

**Products used: Solid / Ribbed / 3D Panels, Arc Stick, & Printed Panels**
