

Experian

(Technology)

Experian is a global information services company, helping individuals and businesses make smarter decisions through data and analytics. But to do that well, their teams needed an environment that made work feel lighter, calmer, and more human.

That's where we came in. We helped design a workplace that's fun to walk into, easy to stay in, and genuinely uplifting to work from. Using a mix of standard and custom-made products, we brought their vision to life, creating a space focused on employee happiness and everyday ease.
