

Gartner

(Technology)

Chennai moves at its own unhurried rhythm: sea breeze, morning filter coffee, and offices that quietly power the global tech grid. At Gartner's Chennai campus, that calm was breaking. Reflective surfaces, long corridors and busy collaboration zones were pulling focus away from work. We used Cara's Lagom and Meraki on key walls, near teams that talk the most, and soft felt accents to turn echo into a gentle backdrop, keeping conversations clear and minds settled.
