

# PROJECT

# | HIGHLIGHTS |

Client: Priceline

City: Mumbai

Designer: Beyond Designs

Completion: 2021

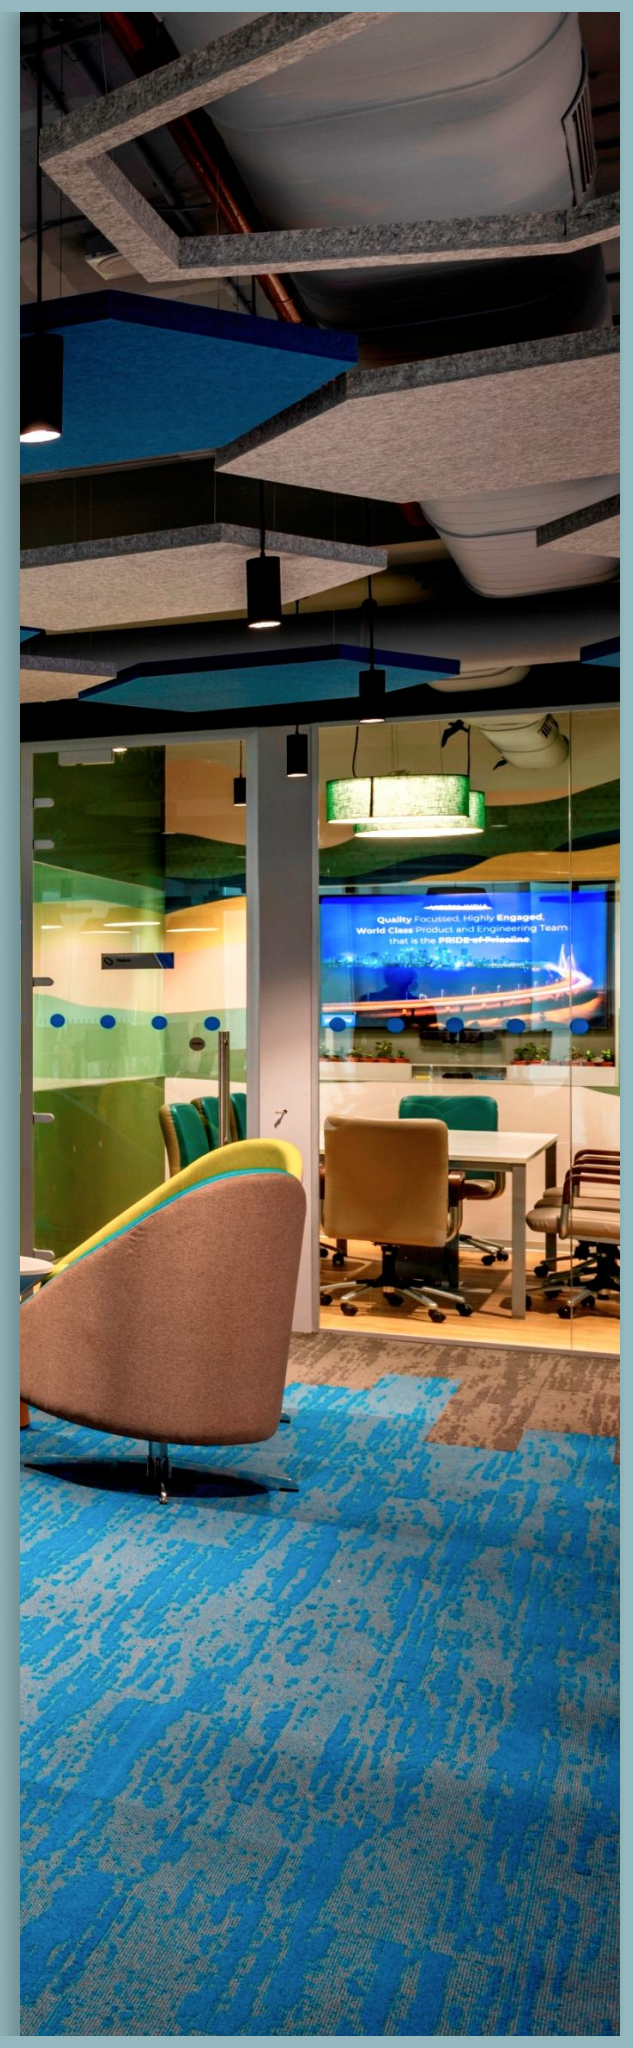

**Priceline** is a subsidiary of Booking.com, managing the back-end support for travel technologies and algorithms. The design brief was manifold. They wanted to maintain the stature of a global company while bringing a hint of Indian culture. Additionally, the workspace had to promote diversity while feeling more welcoming, cordial, and hospitable.

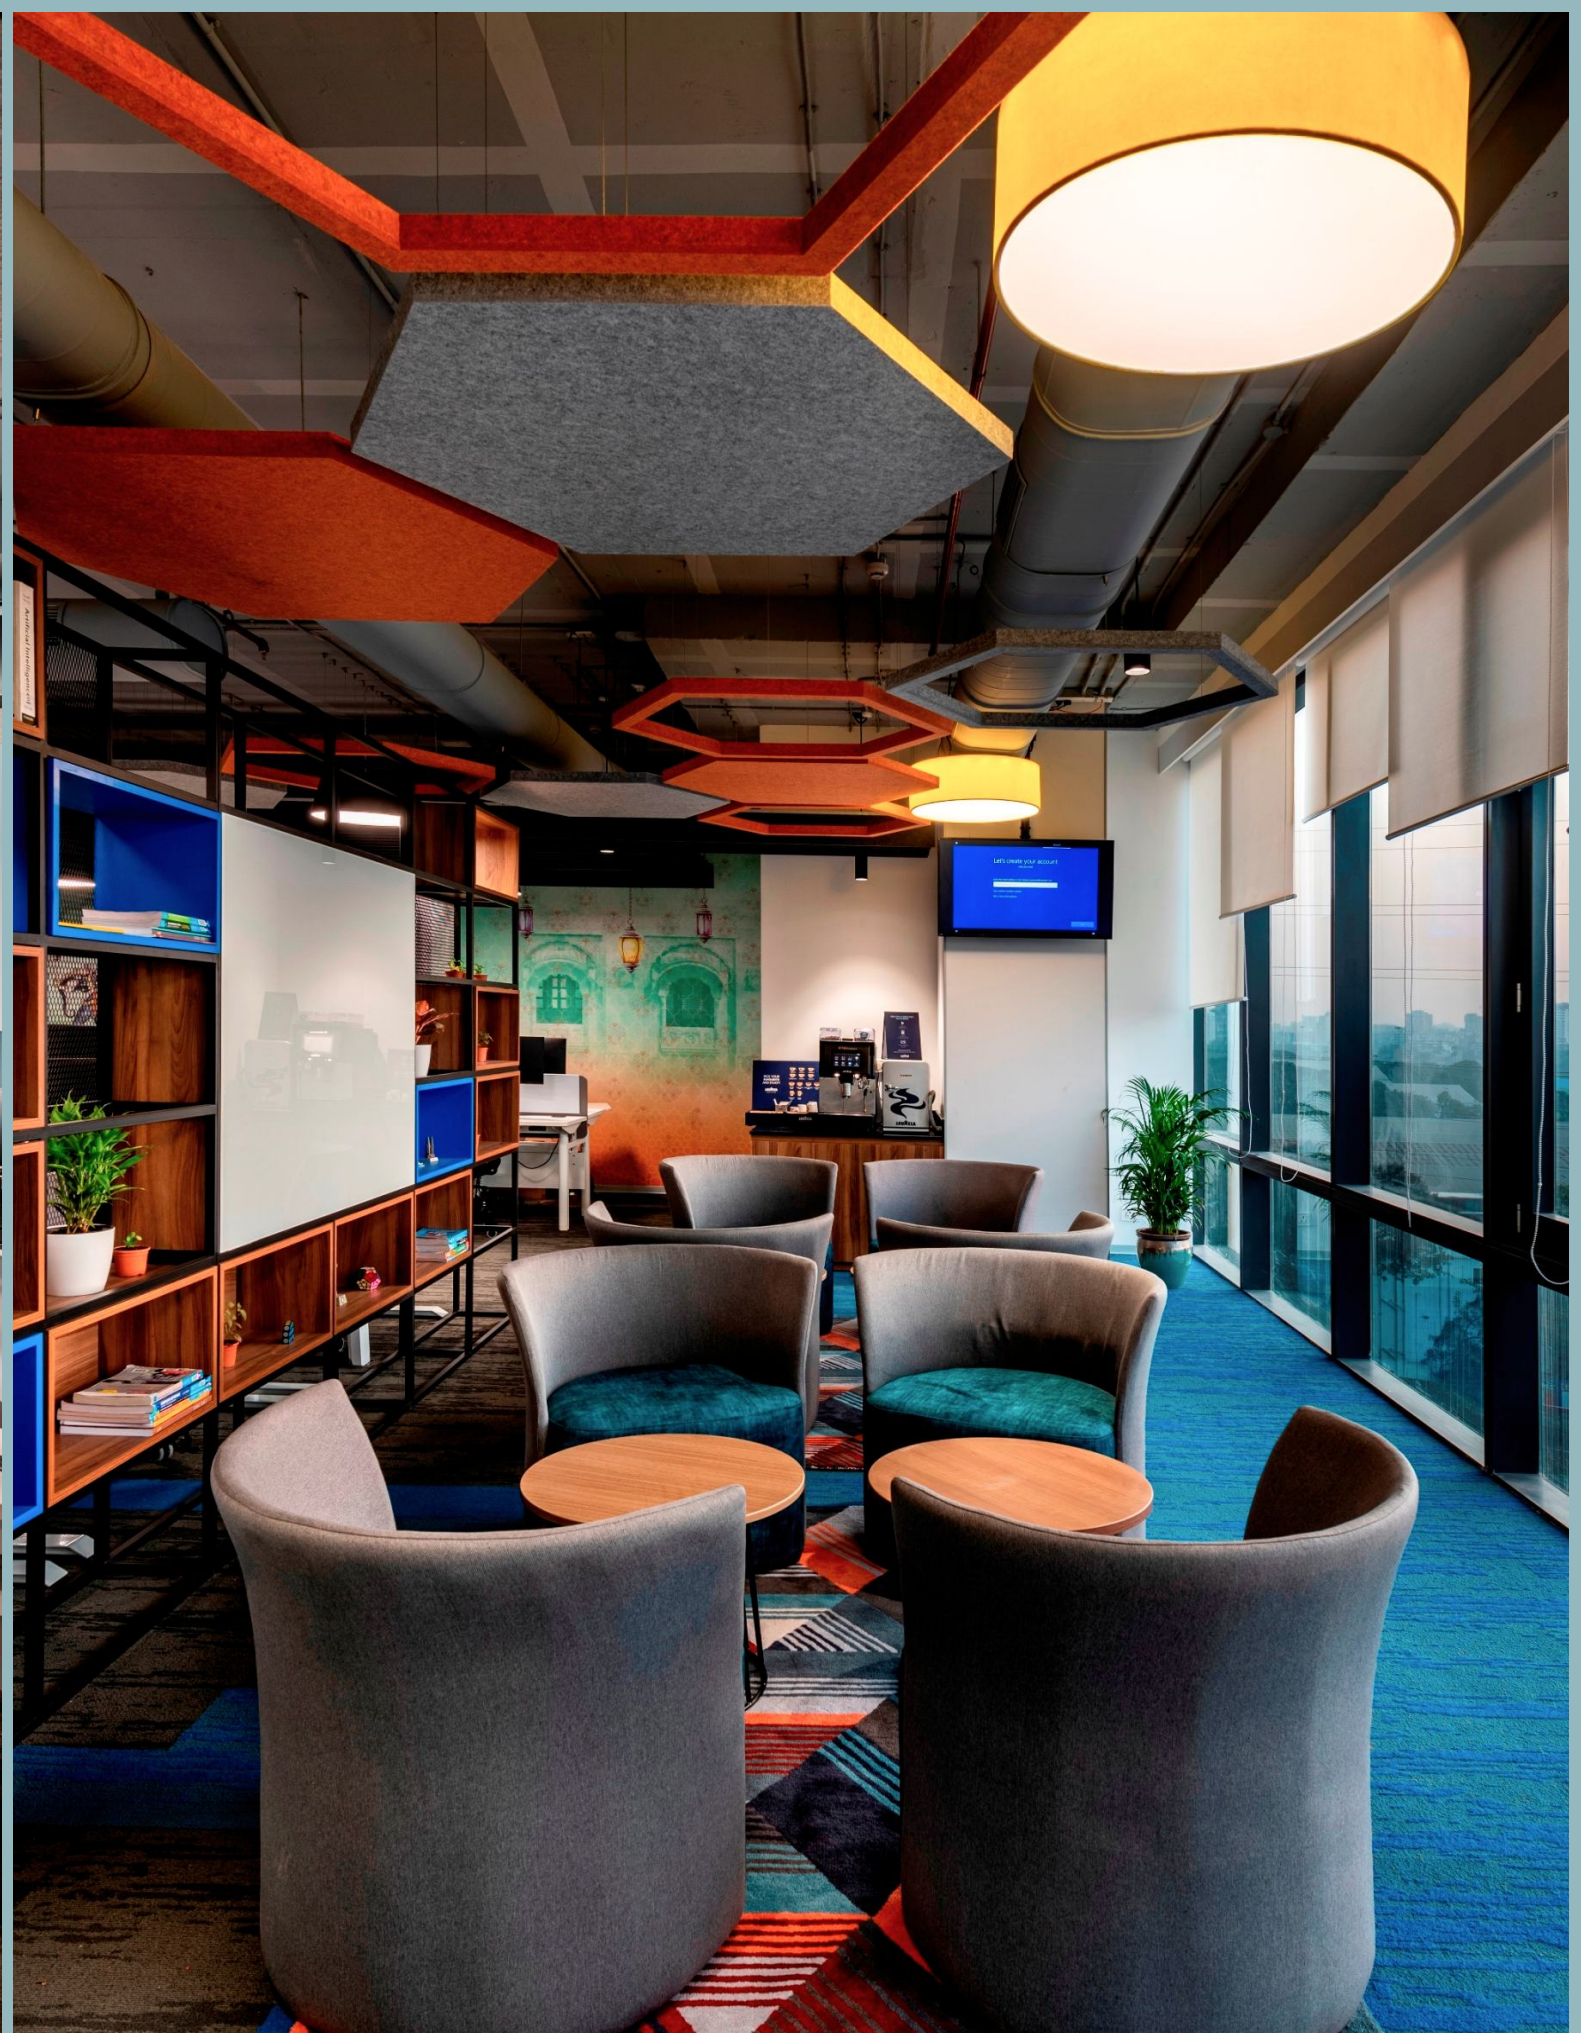

Based on client expectations, we outlined an easy vision for their workspace that had a modern touch with contemporary elements infused with technology. We proposed an integrated plan for incorporating acoustic furniture, lighting, wall panels, and ceiling enhancers to holistically improve the value of the space. The products were custom-made to suit the brand aesthetics and visual language, thereby fostering a value-driven workplace culture.

**Products used: Acoustics, Grid Ceilings, & Pendants**
