

PROJECT

| HIGHLIGHTS |

Client: Rockstar Games

City: Bangalore

Designer: RC Architecture

Completion: 2020

Rockstar is a legacy brand in the gaming industry and they wanted their workspace to reflect just that. Additionally, they required their office to foster an environment conducive to growth and productivity. At its core, Rockstar wanted to strike a balance between vibrance and solitude.

We implemented a combination of acoustic panels and ceiling enhancers throughout their office to create a peaceful and performance-driven environment. The use of a soothing pastel color scheme on the walls contributes to a calming atmosphere. To break the monotony of a neutral color scheme, blue wall panels are used. Installing customized ceiling enhancers enabled us to make a difference in the comfort of the space.

Products used: Acoustics and Ceiling Products
