

# PROJECT

# | HIGHLIGHTS |

Client: Unilever

City: Bangalore

Designer: RC Architecture

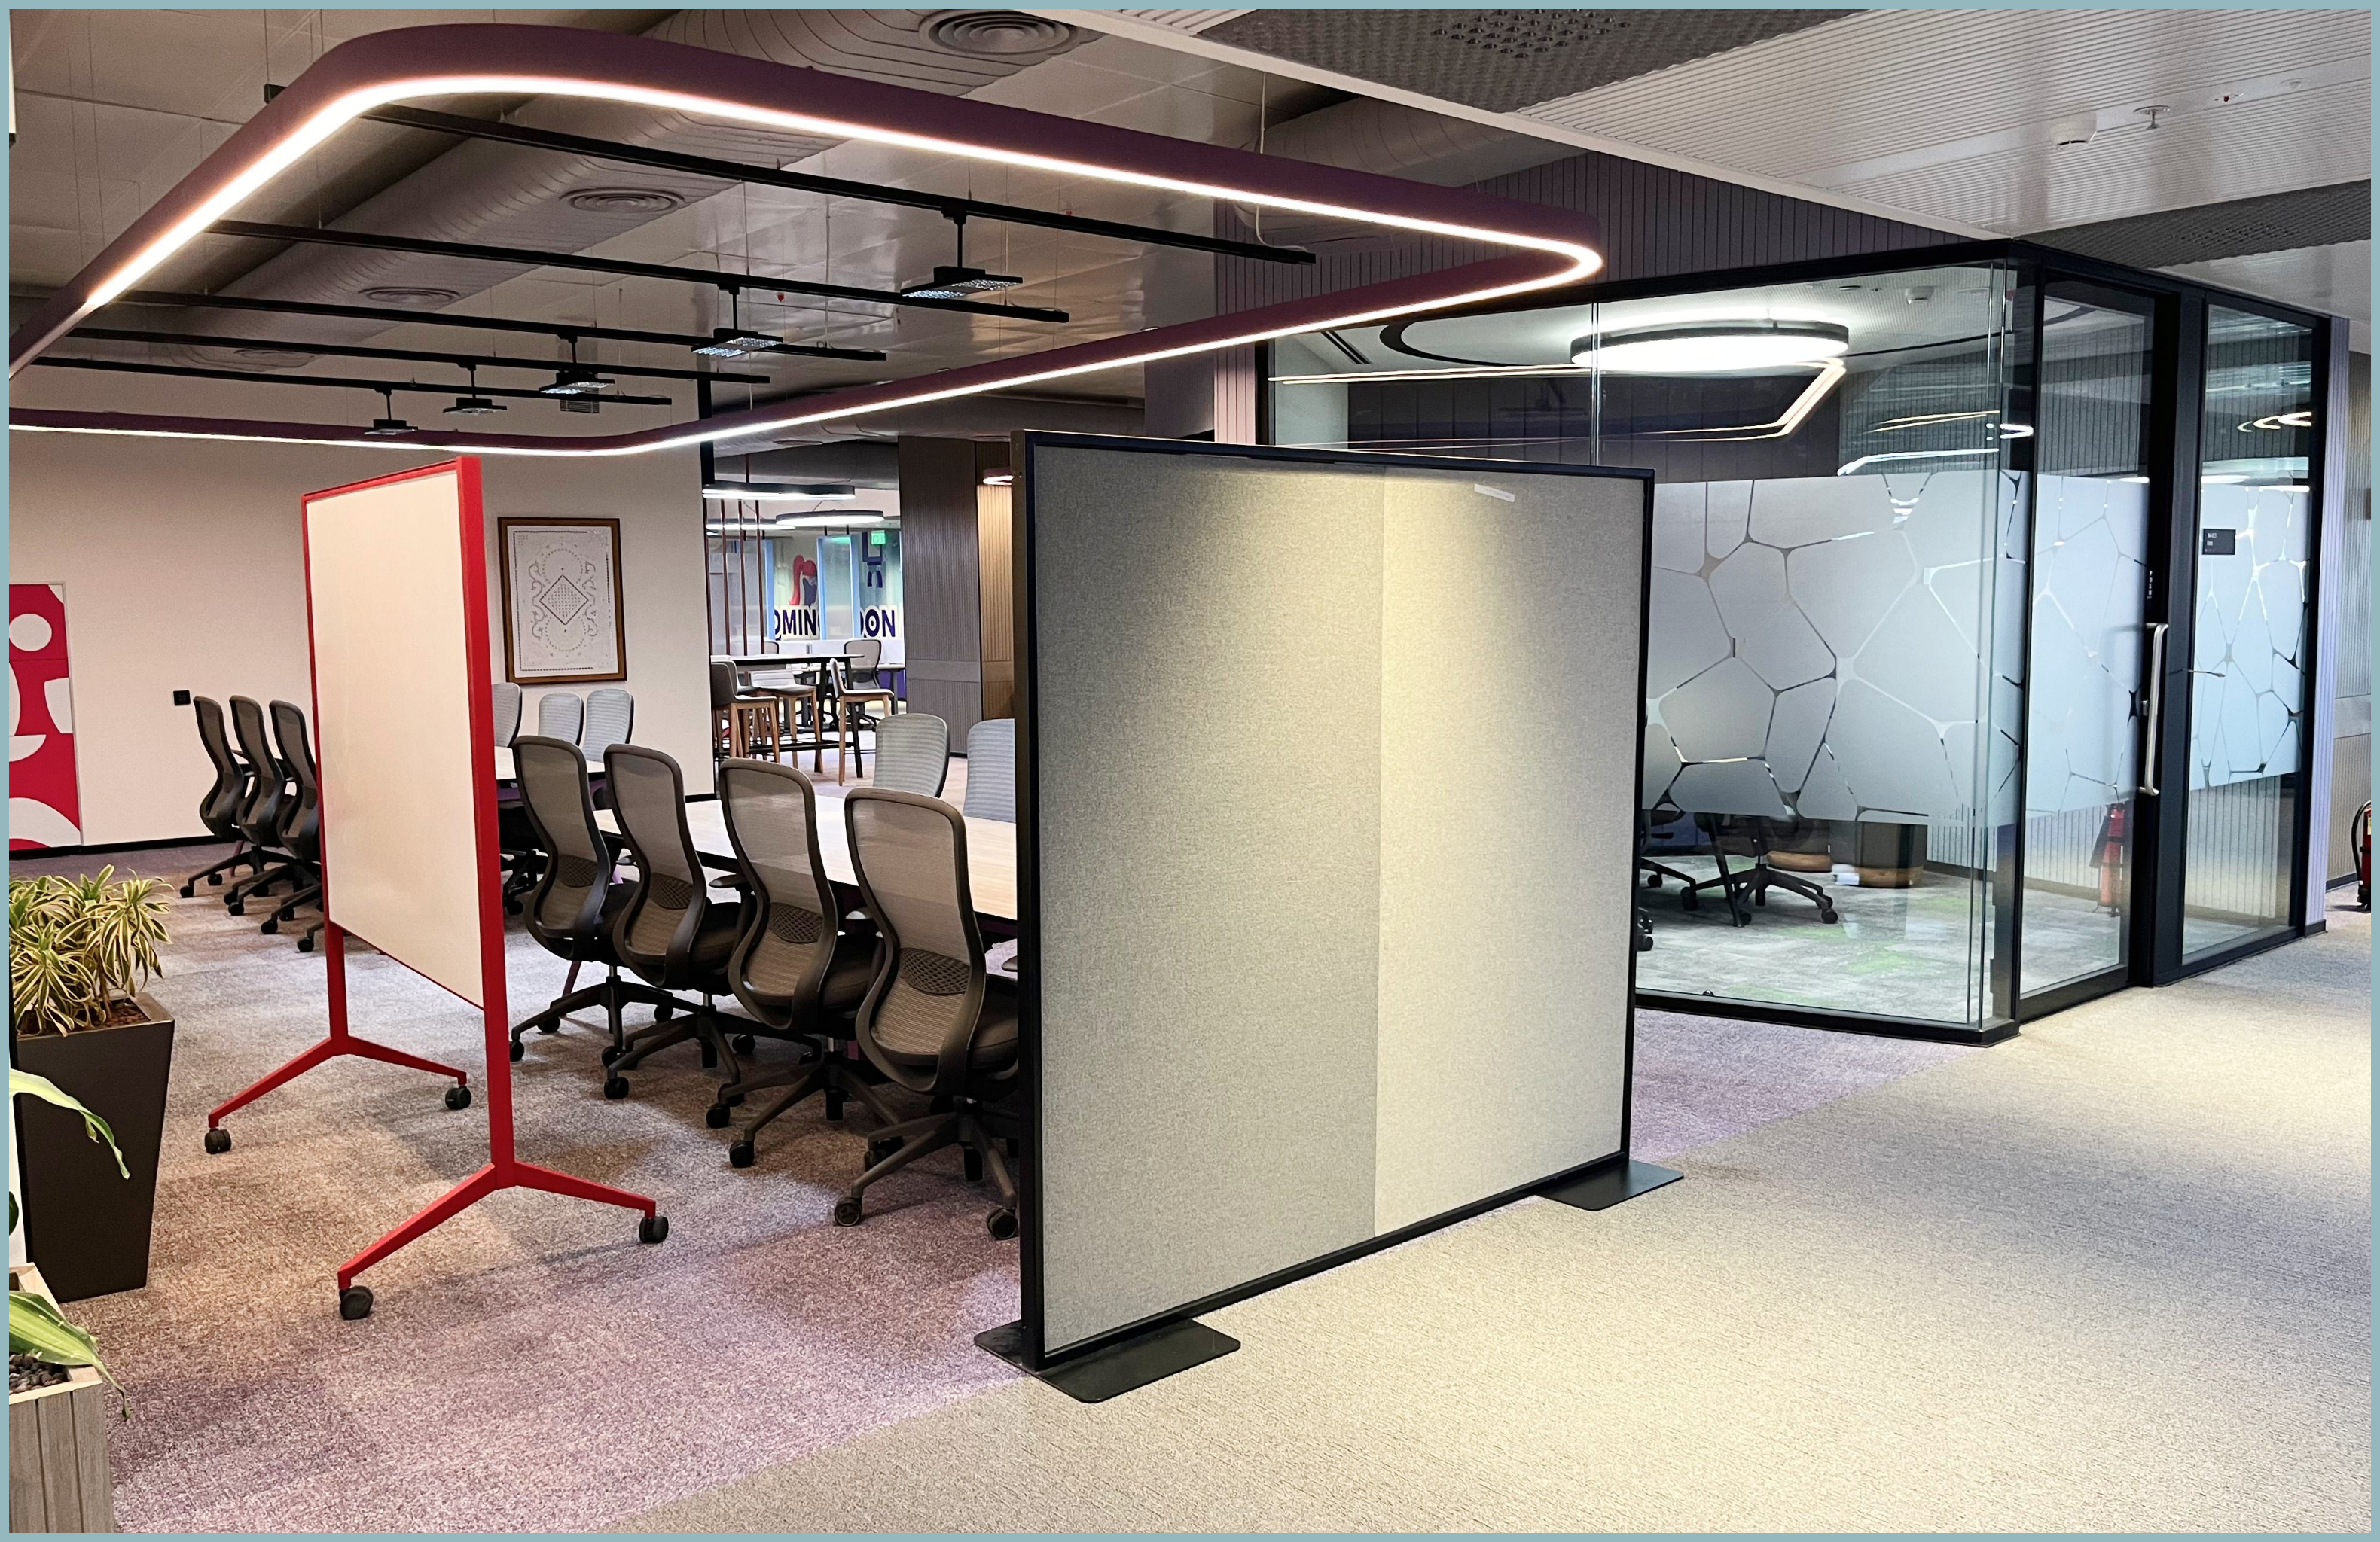

Completion: 2024

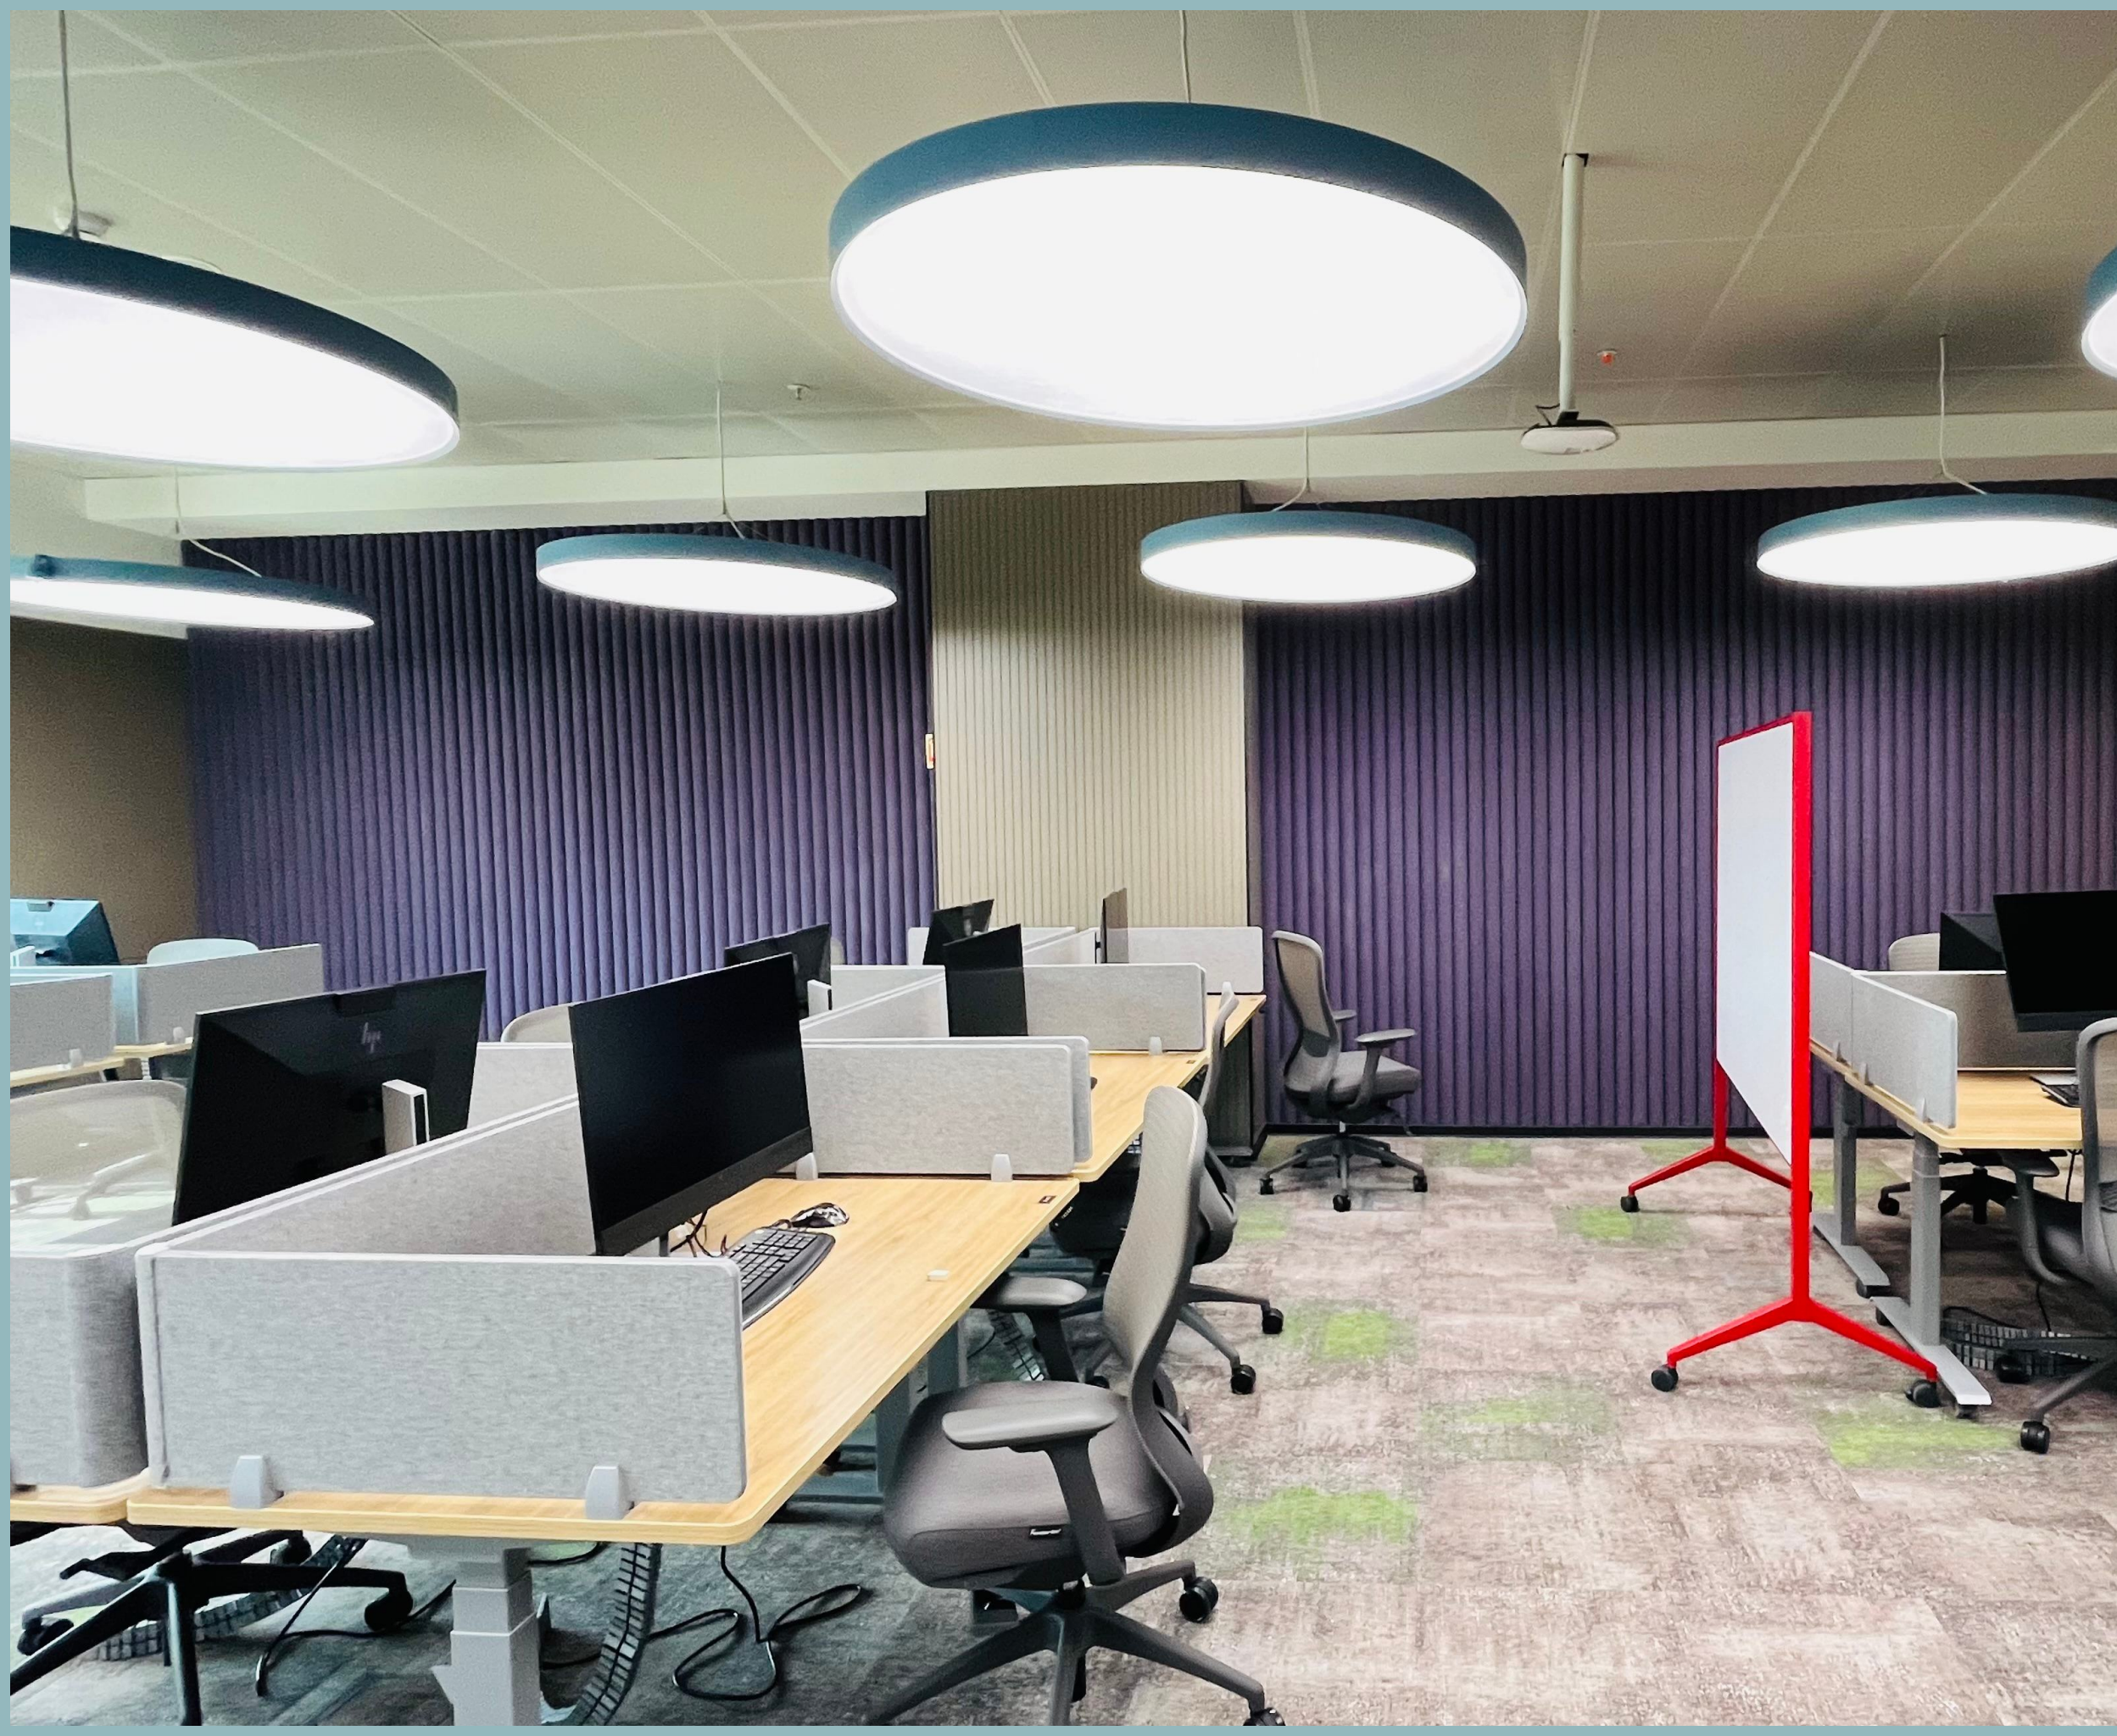

Unilever is one of India's largest FMCG brands, redefining the landscape of consumer goods in the country. Given the dynamic growth of the company, they needed a workspace that showcased its versatility and pursuit of excellence at its best.

Bringing their aspiration to life, this project showcases a modern workspace with a variety of work areas such as private meeting rooms, open workstations, and collaboration areas. The integration of acoustic wall panels helps in minimizing noise distractions and improving focus. Additionally, the use of space dividers and sound-absorbing ceiling panels ensure the creation of a conducive and productive environment.

**Products used: Space Dividers, Acoustic Lightings, Plush, Cara & Groove Panels**
