

PROJECT

| HIGHLIGHTS |

Client: Wipro

City: Pune

Designer: Beyond Designs

Completion: 2020

Wipro required acoustic solutions to optimize their experience center, training rooms, and media rooms. The intent was to enhance the focus of people occupying the space while aiding collaboration.

Our acoustic solutions were bifurcated throughout collaborative zones within the office to create disturbance-free zones. This helped the creation of quite focussed areas where employees could huddle up for quick meetings as well as individual work. We designed seamless patterns of acoustic panels that transitioned from floor to ceiling, thereby maintaining uniformity in the overall design.

Products used: Acoustic Walls and Ceiling panels
