

ZF

(Manufacturing)

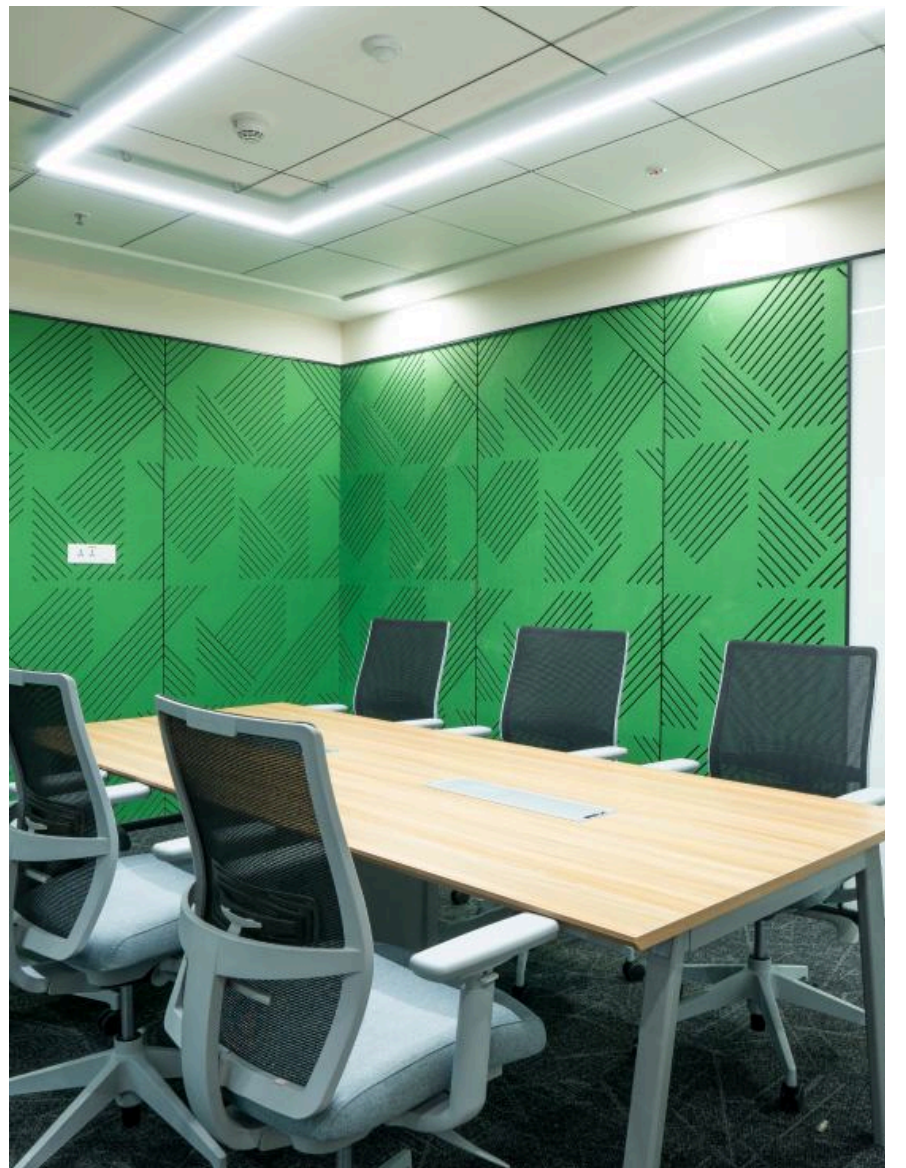

This German automotive parts manufacturer is a celebrated industry leader with significant contributions to the automotive industry. When planning the Hyderabad office, the architects aimed to create a welcoming, home-like environment that authentically reflected Indian culture.

To realize this vision, we incorporated a combination of design elements that seamlessly merged comfort with style. We used felt-based panels with grooves to create elegant divider screens, providing privacy in open workspaces. The ceiling featured a baffle design, which not only added architectural sophistication but also optimized acoustics.
